**SUBJECT: CSMRI ENVIRONMENTAL ASSESSMENT AND RESPONSE PHASE II
TRANSFER OF REMEDIATION DATA**

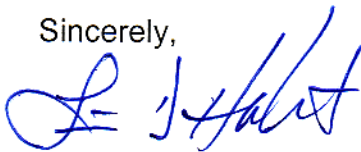

Dear Mr. Spencer:

Please provide copies of Site analytical data collected to date from the CSMRI Site. Include field reports of excavation data, ISOCS analysis reports, and off-site laboratory analysis reports.

Copies of interim field reports will be satisfactory – this is not a request for final Site data, nor a request to provide final data review, or overall data reduction.

Transfer of the data is needed to allow evaluation of the Site soils by the School and disposal facilities through risk assessment to gain final approval for disposal. Please cooperate with disposal facilities as necessary to gain disposal approvals.

Sincerely,

Linn D. Havelick
