None

Summary of Samples Taken (Attach Log):

None

Summary of Documents Reviewed, But Not Copied (Note-Taker should record in notes):

N/A

Summary of Copies of Documents Taken (Attach Log):

N/A

Copies of Documents Requested at Closing Conference or Post Visit (Number and Location):

Final ^{GM} Summary of Agency Visit

Notes Taken by Visitor(s)?

YES

NO

Extent of Notes Taken

CD PHE personnel performed a comprehensive gamma survey at the site. Readings were taken at 10m x 10m grids or closer depending upon the area.

Gamma readings in the western end were generally 25-30 uR/hr with a high of 45 uR/hr (less than 1m²).

In the center area east of Bldg 101 (meta ls area) readings were less than 25 uR/hr (a few small areas < 1m² went to 35 uR/hr).

All excavations were investigated and were less than 35 uR/hr.

From the gamma survey - no unusual or high gamma areas were detected. Noted gas smell in two deep trenches at the north.

Concern: Safety - open pits (fenced or backfilled)

occ. by sewer line

Alleged Violations and/or Citations:

None

Time Visitor(s) Departed: 11:30

Representatives Participating in Agency Visit: Linn Havelick, esm
Steve Brinkman - Stoller
