Subject: CSMRI Bagged Soils Acceptance

Hi Linn,

The BFI/Allied Waste Special Waste Group has determined that the subject soil will be acceptable for disposal at the Foothills Landfill if the following are submitted:

1. New profile form
2. Final analytical
3. Letter from the State stating that this material is acceptable for disposal at a Subtitle D facility such as Foothills Landfill.

I have scheduled to meet with Joe Gordon tomorrow afternoon at Foothills to start the risk assessment. Please let me know if you have any questions,

Elizabeth Stengl
